

Dr. Ahmet Cengiz YILDIZCI

1982

It is really difficult to write about our distinguished professor Kemal Ahmet Aru. I would like to emphasize here that Professor Aru had a personality keen on the nature. Both in architecture and in planning, he has always approached matters through their integrity with the nature, and he tried to inspire his students to do so. His vast collection of slides is more versatile and more numerous than necessary to reflect the landscape architecture lessons.

Throughout our school years, Professor Aru had a personality which could reach everyone not just as a professor but also as a father, brother and a friend.

I hope that we will get to spend as much time as we did with Professor Aru, from whom we did and we will learn a lot; and I wish him health and happiness in the future.

Assist. Prof. Ahmet Cengiz YILDIZCI
